<input checked="" type="checkbox"/> NON-COMPETITIVE SELECTION METHODOLOGY: Sole Source			

PRIOR CONTRACT HISTORY:
No prior contract history.

NEW PROPOSAL JUSTIFICATION:
The contract will assist with the insourcing, the development and management of the Care Management Information System. The system will be built by the CCH Clinical Research Unit (CRU). Post construction the system will be co-managed by the CRU and the CCH IT department. This is being created to support a care management system that is able to change in a timely manner in response to changes in process, reporting requirements or functionality. Early reviews indicate that it will support a more effective workflow for the care coordinators and tools for managers to support staff. Mr. Madison is uniquely capable of translating the Care Management Unit's requests and needs into the programming language that will allow the CRU to build the system in an efficient and effective manner. He will also assist in documenting how work flows through the programming and how the system is built, which prior Care Management system contractors have been unable to accomplish. There are plans for the system to automate tasks and workflows that are now manual.

This request is Sole Source due to specialized nature of Mr. Madison's multi-disciplinary expertise, and need to have system ready before expiration of the existing software contract in March 2020. Mr. Madison has agreed to bill at below his market rates.

TERMS OF REQUEST:
This is a request to execute contract number H19-25-082 in an amount not to exceed \$180,000.00 as needed, for a period of twelve (12) months from 09/01/2019 thru 08/31/2020.
